Cheat Sheet

The Problem

Imagine you're part of an architectural working crew for Legoes. They want a building in Paris (A) made of red Legoes — and a house in Kansas (B) made of colorful Legoes. They'll assign Legoes to each team day.

Problem: Legoes can't fly across oceans. They can't move overseas.

Architectural Constraint:
Legoes can't fly across oceans.

Why Kubernetes Was Needed

In Kubernetes, pods, Nodes, and Services (pages coming soon) Deployment (coming soon) Volumes (coming soon) Namespaces (coming soon)

Imagine your company's business requirements. Your team needs to deploy a web app, a database, and a cache.

Why Kubernetes Was Needed

Imagine you're part of an architectural working crew for Legoes. Your team needs to deploy a web app, a database, and a cache.

Problem: Legoes can't fly across oceans. They can't move overseas.

Architectural Constraint:
Legoes can't fly across oceans.

What This Workflow Does

Imagine you're part of an architectural working crew for Legoes. You have two environments (images of houses) lighting and materials (colorful Legoes) ready. Your team needs to deploy a website. Kubernetes, Dockerfiles, multistage builds, and Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. You have two environments (images of houses) lighting and materials (colorful Legoes) ready. Your team needs to deploy a website.

The Complete Workflow

Step 1 Open and Inspect Blueprints

The Dockerfiles. Nginx.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Step 2 Training (Pull Base Images/Blueprints)

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Step 3 Building (Pull Project Dependencies/Build Project Binary)

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Step 4 Assembling (Copy Project Binary/Configure Runtime)

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Step 5 Shipping (Define Startup Command)

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Step 6 Run (Start Container)

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Imagine you're part of an architectural working crew for Legoes. Kubernetes, Dockerfiles, multistage building, Docker Compose automate the entire process.

Dockerfile Syntax
