

You've mastered the Alpha Prompt system. You can iterate like a professional. Your AI remembers your preferences and generates consistent results. Now we apply this systematic approach to **real-world photography styles that clients actually pay for.**

Module 4 is about **practical application** across high-demand visual categories. For each style, we'll deconstruct the essential elements, build targeted Alpha Prompts, and create comprehensive keyword libraries. This isn't theory – it's a professional toolkit for generating compelling imagery across diverse creative challenges.

From adrenaline-pumping adventure sports to sophisticated fashion editorials, from authentic lifestyle moments to precision product shots – you'll have **systematic approaches for every major photography category.**
