

Strategy 6 — Selling Knowledge (Courses, Prompts, Systems)

Productize What You Know

Client work trades time for money. Knowledge products trade value for freedom.

Every project teaches you something. Every problem you solve becomes a system. Every breakthrough you make can help someone else break through.

The question isn't "What do I know?" It's "What do I know that others need?"

When to Start

Most wait too long. Here's the truth:

You're ready when:

- People ask "How did you do that?" regularly.
- You solve the same problems repeatedly.
- Your DMs fill with process questions.
- You've proven results publicly.
- You catch yourself teaching for free.

You don't need to be the world expert. Just two steps ahead of your audience.

What Actually Sells

The market doesn't care about your knowledge. It cares about its problems.

High-Value Prompt Systems

The instant gratification play.

- **What works:** Style-specific prompt packs, industry-focused templates, workflow accelerators, consistency frameworks.
- **Price range:** \$47-297
- **Why they buy:** Immediate results, no learning curve.

Short Creative Workflows

The transformation shortcut.

- **What works:** 30-minute process videos, step-by-step breakdowns, tool combination guides, speed techniques.
- **Price range:** \$97-497
- **Why they buy:** A clear path from A to B.

System Blueprints

The business builder.

- **What works:** Complete creative systems, client management templates, pricing calculators, project frameworks.
- **Price range:** \$297-997
- **Why they buy:** Proven systems that scale.

Mini-Courses + Templates

The deep dive.

- **What works:** Focused skill building, actionable frameworks, real project walkthroughs, community access.
- **Price range:** \$497-2,997
- **Why they buy:** Transformation, not just information.

The Value Equation

Price isn't about pages. It's about problems solved.

Value multipliers:

- Time saved (quantify it)
- Money earned (prove it)
- Mistakes avoided (list them)
- Results accelerated (show them)

A 10-page system that saves 20 hours monthly is worth more than a 200-page theory book.

Your Proven Model

Real products that work:

- **The Prompt Language Engine:** A specific system for consistent results with a clear value proposition and immediate implementation.
 - **AI Visual Mastery:** A comprehensive transformation with multiple learning paths, a community component, and ongoing value delivery.
- Both solve real problems. Both deliver measurable results. Both sell because they work.

Packaging for Profit

How you present determines what people pay.

- **Basic package:** Just the content (PDF or video, DIY implementation, email support).
 - **Premium package:** Content + context (main training, templates, case studies, group calls).
 - **VIP package:** Content + transformation (everything above, plus 1-on-1 sessions and custom workflows).
- Same core content. 3x-5x price difference.

The Launch Sequence

Launching isn't an event. It's a campaign.

- **Week -4: Seed the idea.** Share wins from your system and build anticipation.
- **Week -2: Open cart.** Present a clear offer, share social proof, and use limited time/quantity.
- **Week 0: Close strong.** Send final value reminders, increase urgency, and reveal bonuses.
- **Week +2: Deliver excellence.** Exceed expectations, capture testimonials, and plan the next iteration.

Each launch teaches you what to improve.

Platform Decisions

Where you sell matters less than what you sell. But here's the breakdown:

Gumroad

- Simple setup
- Higher fees
- Good for starting
- Limited marketing tools

Stan Store

- Creator-focused
- Better analytics
- Link-in-bio integration
- Growing platform

Your own site

- Full control
- Lower fees
- More work
- Better branding

Start simple. Migrate when it makes sense.

Recurring Revenue Plays

One-time sales are good. Recurring revenue is better.

Models that work:

- **Prompt Library Membership:** New prompts monthly, style updates, technique videos, community access. Price: \$29-97/month.
 - **Creative Community:** Weekly workshops, peer feedback, resource sharing, direct access to you. Price: \$97-297/month.
 - **Implementation Program:** Cohort-based learning with accountability and live sessions. Price: \$497-997/month.
- Stack recurring revenue. Sleep better.

The Trust Requirement

Knowledge products live or die on trust.

Trust builders:

- Free value consistently delivered
- Results shown, not claimed
- Student success highlighted
- Refund policy prominent
- Under-promise, over-deliver

Trust killers:

- Hype without substance
 - Hidden costs
 - Fake scarcity
 - No student results
 - Over-promise, under-deliver
- Your reputation is worth more than any single sale.

Scaling Your Expertise

Success creates opportunities:

- **Level 1:** Sell what you know.
 - **Level 2:** Sell what works.
 - **Level 3:** Sell transformation.
 - **Level 4:** Sell certification.
 - **Level 5:** Sell the system to sell.
- Each level multiplies value and the price point.

Common Knowledge Product Mistakes

- **Mistake 1: Making it too broad.**
Fix: Solve one problem deeply.
- **Mistake 2: All theory, no action.**
Fix: Include templates, examples, and exercises.
- **Mistake 3: Underpricing value.**
Fix: Price for transformation, not time.
- **Mistake 4: Launch and abandon.**
Fix: Iterate based on feedback.
- **Mistake 5: Competing on price.**
Fix: Compete on results.

The Compound Benefit

Knowledge products aren't just revenue. They're:

- Authority builders
- Lead magnets
- Client qualifiers
- Passive income
- Portfolio pieces

Every sale strengthens your position. Every student success becomes your success.

The Reality of Digital Products

Year 1: Build and test

Year 2: Refine and scale

Year 3: Systematize and delegate

It's not overnight success. It's compounding value over time. But when it works? You make money while you sleep. While you create. While you live.

The Bottom Line

Your knowledge has value. Your systems save time. Your experience prevents mistakes.

Package it. Price it. Provide it.

But only if it actually helps. Only if it delivers results. Only if you'd buy it yourself. No fluff. No empty PDFs. No recycled theory.

Real value. Real transformation. Real business.
